

BEYOND COVID-19:

**A FEMINIST PLAN FOR
SUSTAINABILITY AND
SOCIAL JUSTICE**

SARAH HENDRIKS
DIRECTOR-POLICY, PROGRAMME &
INTERGOVERNMENTAL DIVISION

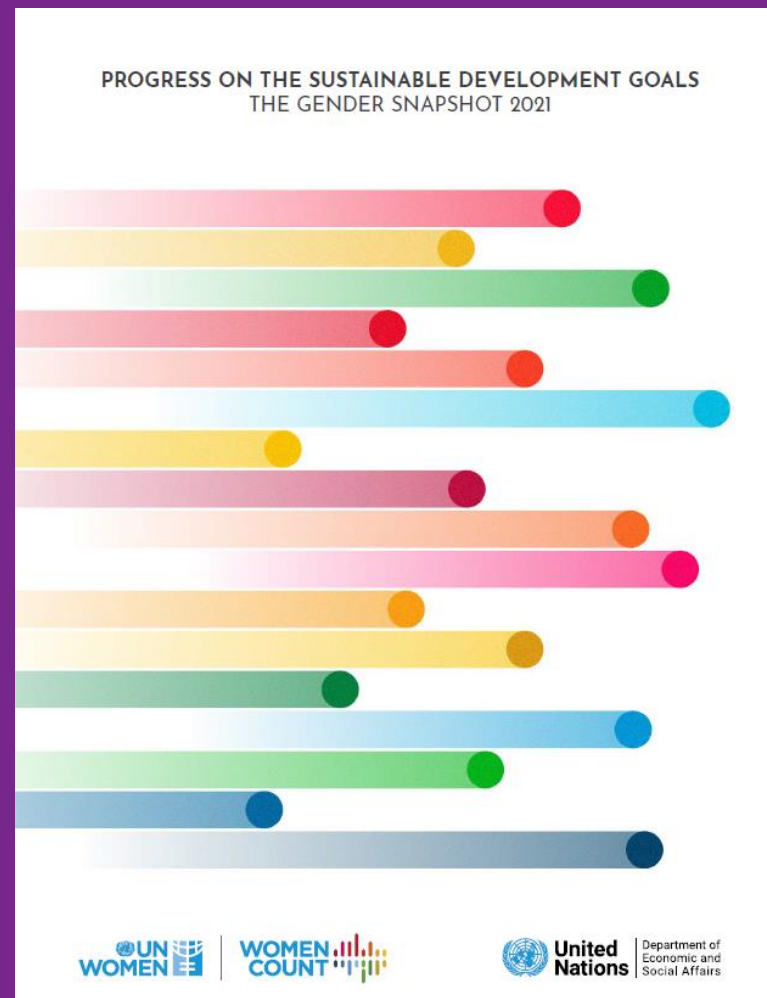

Are we on track to achieve SDG5 by 2030?

Latest global assessment reveals a long road ahead.

*SDG 5 has 14 official indicators but 18 are shown given 5.1.1 and 5.5.1 have multiple sub-indicators.

COVID-19: THE BIG REVEALER

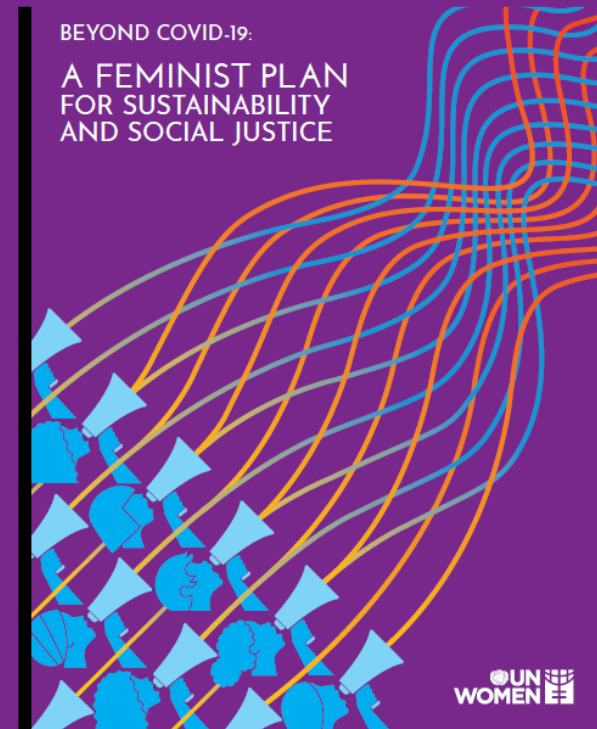

A trio of interlocking crises:

- A jobs and livelihoods crisis
- A global care crisis
- An accelerating environmental crisis

These crises are deeply rooted in an economic system that fails to value, protect, nourish and invest in what's essential.

A FEMINIST PLAN FOR SUSTAINABILITY AND SOCIAL JUSTICE

JOBS

WOMEN'S FRAGILE ECONOMIC PROGRESS, DERAILED:

Globally, in 2019 and 2020,
women lost more than

54 million jobs

Across 45 countries,
one in five women
reported losing their job
during the pandemic.

KEY LEVERS FOR AN ECONOMY THAT SUPPORTS WOMEN'S LIVELIHOODS

- Creating new jobs in sustainable sectors, and ensuring women get their fair share
- Investments in universal, gender-responsive social protection systems
- Rebuilding local and global food systems with women food producers and vendors

CARE

PUTTING CARE AT THE CENTRE OF A SUSTAINABLE AND JUST ECONOMY

THE CARE ECONOMY IN CRISIS MODE:

Countries across sub-Saharan Africa rely on over

900,000

community health workers to support their fragile health systems.

Over two thirds of these frontline workers are women.

86% are unpaid.

- Investments in the care economy to create jobs and address care deficits
- Partnerships between governments and communities to strengthen access to and quality of care services

CLIMATE

SYSTEMIC CRISES ARE
GENDERED,
THE ENVIRONMENT IS NEXT

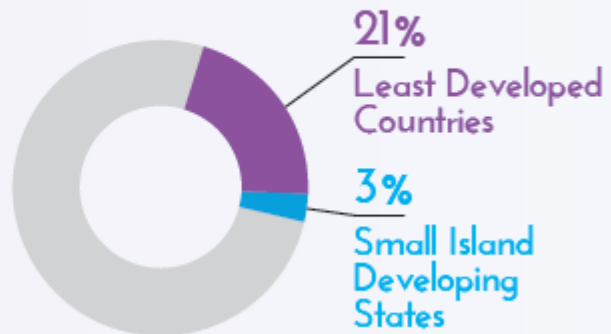

GENDER JUST TRANSITIONS FOR A SUSTAINABLE FUTURE

- Investments in gender-responsive policies to mitigate and adapt to climate change
- Empowering local communities for gender-just transitions in energy and agriculture.

Only
2.5%
of COVID-19
rescue and
recovery spending
by the world's 50
largest economies
in 2020 was green

Amount of climate finance received
in 2017–2018:

POLITICS

PROGRESSIVE AND FEMINIST POLITICS:

Out of 262 task forces
across 130 countries,
women are only 24% of
COVID-19 task force
members

FEMINIST POLITICS FOR A POST- COVID WORLD:

- Boosting women's representation and feminists' influence in politics
- Supporting women's rights organizations
- Building progressive coalitions and work across silos to resist backlash
- Filling gender data gaps for greater accountability
