

[Preliminary Workshop] Opening Remarks

Mr. Ick-Hoon Choi
Executive Director
Korea Environment Corporation (K-eco)

Mr. Ick-Hoon Choi is Executive Director of the Korea Environment Corporation (K-eco), a leading environmental management organization of Korea Republic headquartered in Incheon, Korea. Mr Choi was appointed K-eco's Executive Director in 2017. He has been working with K-eco for 25 years in a variety of position in water sector, including responsibilities for K-eco's technical, international and communications programs and served as the organization's chief technical officer of water supply and sewerage contributing to government policy-making and practices on wastewater treatment, water reuse, urban drainage and flood control. Before joining K-eco, he worked as a chief engineer of Byuck-san development company and Hyundai oil & refinery for 10 years. Currently, Mr. Choi, as an executive director, is leading the national environment data platform programme with his expertise and 25 years of experience in national water quality monitoring and advancing national waterworks on water supply, wastewater treatment and sewer networks. Mr. Choi graduated from Yonsei University and holds a certification of Professional Engineer Civil Engineering Execution.
