

## **Executive 2025 Executive Training Course for Policymakers on the 2030 Agenda for Sustainable Development**

### **Call to Action Proposal Plan Template**

Based on what you have learned in the training these last days, please share at least two activities you can propose to support that integrate SDG and climate synergies to drive more efficient and effective SDG and climate implementation in your national context. This template is a guide to think about follow-up and applying knowledge and lessons learned and identifying SDG and climate action opportunities/priorities for your country. See the example provided below. For questions or comments please contact your facilitator(s).

#### **Categories for inclusion**

Main goal and objectives	What is the key goal that the Call to Action Plan will achieve and what are its objectives for each sector/theme/issue area of importance?
Links with Country Strategies and Policies	What national (and, if relevant, regional and subnational) policies, strategies and plans are important to align the Call to Action Plan with, and why?
Added Climate and SDG element	Explain how climate and sustainable development will be integrated and what is the added value to the relevant thematic area or sector.
Rationale	Motivation for strategy that can be used to make the case to ministers, other ministries and agencies, citizens, banks and development partners etc.
Stakeholders to engage	Reflect on key stakeholders who will be affected, including vulnerable groups, vested interests who could pose a barrier, local communities,
Expected outcome	What is the ultimate successful outcome from the Call to Action Plan when fully implemented? What are the benefits for climate and SDGs, for relevant sectors, for impacted communities, for the government, etc.?
Risk management strategy	What are the most important risks that can create problems during planning and implementation? How will they be overcome?

Name: Alomlangsy RAJVONG

Institution and country: Department of International Organisations, Ministry of Foreign Affairs, Lao PDR

Title: Climate – Resilient Infrastructure and Urban Adaptation						
Main goal and objectives	Links with Country Strategies and Policies	Added Climate and SDG element	Rationale	Stakeholders to engage	Expected outcomes	Risk management strategy
<p>Goal: <b>SDGs and Climate Actions implementation</b></p> <p>Objectives: <b>To accelerate the SDGs and Climate Actions implementation; and to mobilize more financial resource for SDGs and Climate Actions as well as to implement the national strategy and plan</b></p>	<ol style="list-style-type: none"> <li>1. National SDGs Implementation Strategy.</li> <li>2. National Strategy on Climate Change</li> <li>3. Financing Strategy (INFF)</li> <li>4. 9<sup>th</sup> and 10<sup>th</sup> NSEDP.</li> <li>5. Developing NDC 3.0 to be submitted before COP30.</li> <li>6. 20 Year National Digital Economic Development Vision (2021-2040), including 10-Year National Digital Economy Strategy (2021-2030), and 5-Year National Digital Economic Development Plan (2021-2025); towards Digital Governance, Digital Economy and Digital Society.</li> </ol>	<ol style="list-style-type: none"> <li>1. Synergy between Climate and SDG elements.</li> <li>2. Reprioritize Climate and SDG elements in the areas that are being implemented well.</li> <li>3. Building climate resilient infrastructure that is also beneficial for SDGs implementation.</li> <li>4. Urban Adaptation planning to be environmental friendly as well as for long-term demand; including waste management, clean urban, green areas, efficient public transportation for lesser congestion and emission, as well as provide incentive for electric vehicle usage.</li> </ol>	<ol style="list-style-type: none"> <li>1. Implementing SDGs also supports climate actions at the same time.</li> <li>2. SDGs implementation is related to climate aspects.</li> <li>3. SDGs Financial support and Climate Action Financial support is insufficient; thus, try to mobilize financial supports by using INFF, particularly the international financial support for SDGs and CC at the same time.</li> </ol>	<ol style="list-style-type: none"> <li>1. In Laos, <b>the works of</b> line ministries and provincial authorities, the UNCT under CDP and UNSDCF, INGOs, CSOs, private sectors and local communities <b>are embedded</b> with climate related activities and consideration.</li> <li>2. Provide incentive for private sector whose business and activities contribute to SDGs implementation, environmental protection and climate actions.</li> </ol>	<ol style="list-style-type: none"> <li>1. Better Climate-Resilient Infrastructure and Urban Adaptation.</li> <li>2. More financial resources (INFF) to support SDGs implementation and Climate Actions.</li> <li>3. Long-term benefits and environmental protection for the future generations.</li> </ol>	<p>Apply LNOB principal. Whole of government and whole of society approach. Building capacity to SDGs and Climate data collection. M&amp;E frameworks. Evidence-based policy decision making.</p>
