SOLUTION

Test Model and Expected
Outcomes

01

INTRODUCTION

Design Thinking Process No. 1)

Empathize: Understanding the users

Malagasy

- **Endangered languages in Ivory Coast and Botswana (ex: Baoulé, Sénoufo)**
- **French > Malagasy by younger Gen in Madagascar**
- **SDG 4.6 Eliminate All Discrimination in Education**
- **SDG 4.7 Education for Sustainable Development and Global Citizenship**
 - **Appreciation of Cultural diversity**
 - **Sustainable development of the native language of Madagascar: Malagasy**

02

PROBLEM STATEMENT

Design Thinking Process No. 2 **Define**
Importance of the problem (Correlation with SDG4)
Why?
How might we?

PROBLEM STATEMENT

**Teaching
language**

**USERS: Children
who do not know
Malgasy**

**Foreign
language**

**Low
performance in.
education**

CORRELATION BETWEEN THE LANGUAGE USED AT SCHOOL AND SDG4 INDICATORS

Comparative analysis between African countries who use a foreign language and Asian countries who use their native language at school

AFRICA

ASIA

VARIABLES	Independent variable: dummy (1: Foreign; 0: Native)	
SDG4 SCORE	-0.013 (0.0006)	0.013 (-0.006)
LITERACY	-0.010 (0.0002)	0.011 (-0.42)
ELEMENTARY	-0.009 (0.008)	0.010 (-0.016)
PRIMARY	-0.010 (0.001)	0.010 (0.0012)
SECONDARY	-0.009 (0.006)	0.009 (0.008)

- Software used: **Stata**
- Methodology: **OLS** (Ordinary Least Square Model)
- Control group: Madagascar, Ivory Coast, Botswana
- Treatment group: South Korea, Indonesia, China
- Source of data:
<https://dashboards.sdgindex.org/>

RESULTS

NEGATIVE CORRELATION BETWEEN LANGUAGE USED AT SCHOOL AND SDG4 INDICATORS IN AFRICA

WHY?

- Why students have to learn in a foreign language?
- Why they don't value their native language?

- **Government policies**
- **Individual preference for a foreign language**
- **No incentives and interest of children to learn their native language**

.....**HOW MIGHT WE
ENCOURAGE CHILDREN TO BE
MORE EXCITED TO LEARN
THEIR NATIVE LANGUAGE?....**

Prototype

Group 7 (SDG 4)

"MIANATRA"

Trigger

Alpha omanas ahy ve e rano w? Quoi??

① Grandpa asks in Malagasy and the grandchild does not understand.

Event

ECOLE LESSON

② At school, there are students and a teacher. Words are written in French and children are taught in French.

Trigger

*p?!

③ The kids tell the teacher that his grandpa asked in Malagasy and they did not understand.

Event

MIANATRA

④ The teacher pulls out a card game for kids that can teach them Malagasy.

Trigger

ALPHABET CARDS	SUBJECT CARDS
A	FRUITS
B	ANIMAL
C	JOB
D	THINGS
...	...

⑤ 26 alphabet + 1 blank card x 2 = 54
16 subject cards + 2 bonus cards = 18

Trigger

A KONDRO (banana) FRUIT

⑥ The kid should pick 1 card from the subject set (Fruits, Animals, Jobs) and 1 card from the alphabet set. Then, they should think of a word that matches both cards. The winner keeps the alphabet card.

Trigger

FALY (Happy) TERITRA (Angry)

⑦ The kid who got it right can pick an emotion card for a bonus point.
9 emotions x 2 = 18

Event

MISAOTRA TONGASONA MANAHAGANA SALAHA

⑧ The kids are happy after playing the game. They get to improve their Malagasy by learning new vocabularies.

03

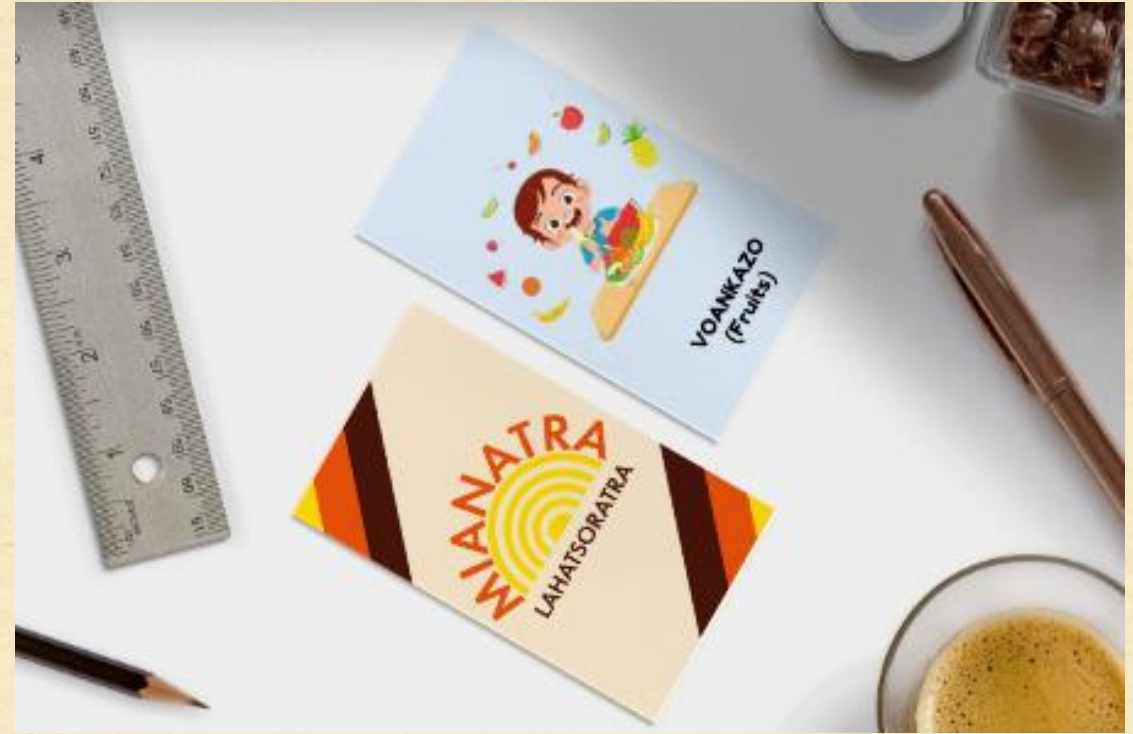

How to Play?

Design Thinking Process No. 3 & 4: **Ideate & Prototype**

26 Alphabet cards + 1 Blank Card x 2 = 54 alphabet cards

16 Subject Cards + 2 Bonus Cards = 18 Subject Cards

9 Emotion Cards x 2 = 18 Emotion cards

(26 Alphabet + 1 Blank Card) x2 = 52 Cards

A	B	C
D	E	F
G	H	I
J	K	L
M	N	O
P	Q	R
S	T	U
V	W	X
Y	Z	

16 Subject Cards + 2 Bonus Cards = 18 Cards

 FANATANJAHATENA (Sports)	 VOANKAZO (Fruits)
 SAKAFO MAIVANA (Snacks)	 SAKAFO (Food)
 TOERANA (Location)	 FIRENENA (Country)
 FIALAMBOLY (Hobbies)	 FAMPISEHOANA (TV Show)
 KILALAO (Toys)	 LOKO (Colors)
 ASA (Job)	 BIBIKELY (Insects)
 BIBY (Animals)	 SARIMIHETSIKA (Movie)
 TANANA (Cities)	 VONINKAZO (Flower)
 ZAVATRA (Things)	 NYNONA (Free Card)

9 Emotion Cards x 2 = 18 Cards

 FALY Happy	 MATAHOTRA Fearful	 ENTANA Excited
 KIVY Sad	 TEZITRA Angry	 GAGA Surprised
 RATSY Disgust	 MANAHY Worried	 MISAOTRA Thankful

Challenge!

Faly aho mihinana akondro!
(Eating banana makes me happy!)

Alphabet 1 point + Emotion 1 point
= 2 points
Incorrect Answer = 0 point

04

Conclusion

Design Thinking Process No. 5 **Test**
Test Model and Expected Outcomes

Test Model

01

Pre-Survey

Parents, Teachers, and Children

02

Free Distribution of MIANATRA

Game played with parents and teachers

03

Post-Survey

Feedback and effectiveness

Achieving Practical Results of the Design Thinking Process

Technically Feasible/Plausible

Simple and straightforward

Economically Viable

Cheap to produce and maximization of efficiency

Desirable for the User

Fun, competitive, and enjoyable

Expected Outcomes (indicators)

Closure of Generation Gap

Elimination of language barrier

Higher Achievements

Higher linguistic and academic achievements if children learn in their native language (Snow, 1990)

(Increase in primary and elementary school enrollment and achievement)

Compatible with SDG 4.5 & 4.7

Decrease in educational inequality (More literacy in Malagasy)

(Less out of school childrens (more excited to go to school)

National Unity & Preservation

Built through shared language and identity.
Saving Malagasy from becoming endangered.
(Increase of No. of Malagasy speakers)

Misaotra

Thank You
