

Knowledge and data as means for realizing synergies

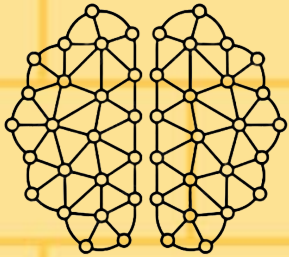

Adis Dzebo, PhD

Senior Research Fellow, Stockholm Environment Institute

Adis.Dzebo@sei.org

Barriers between scientific evidence and implementation of synergistic action?

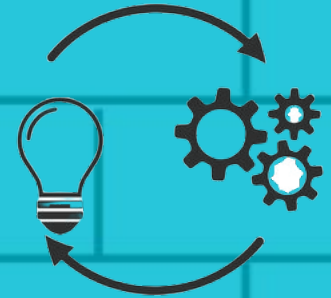

Fragmented
knowledge
dissemination

Proliferation
of tools

Not tailored for
Policy-makers

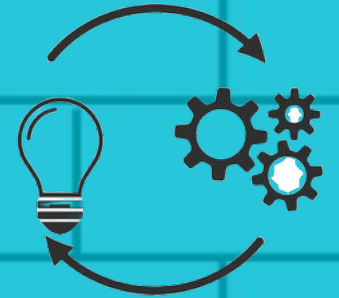

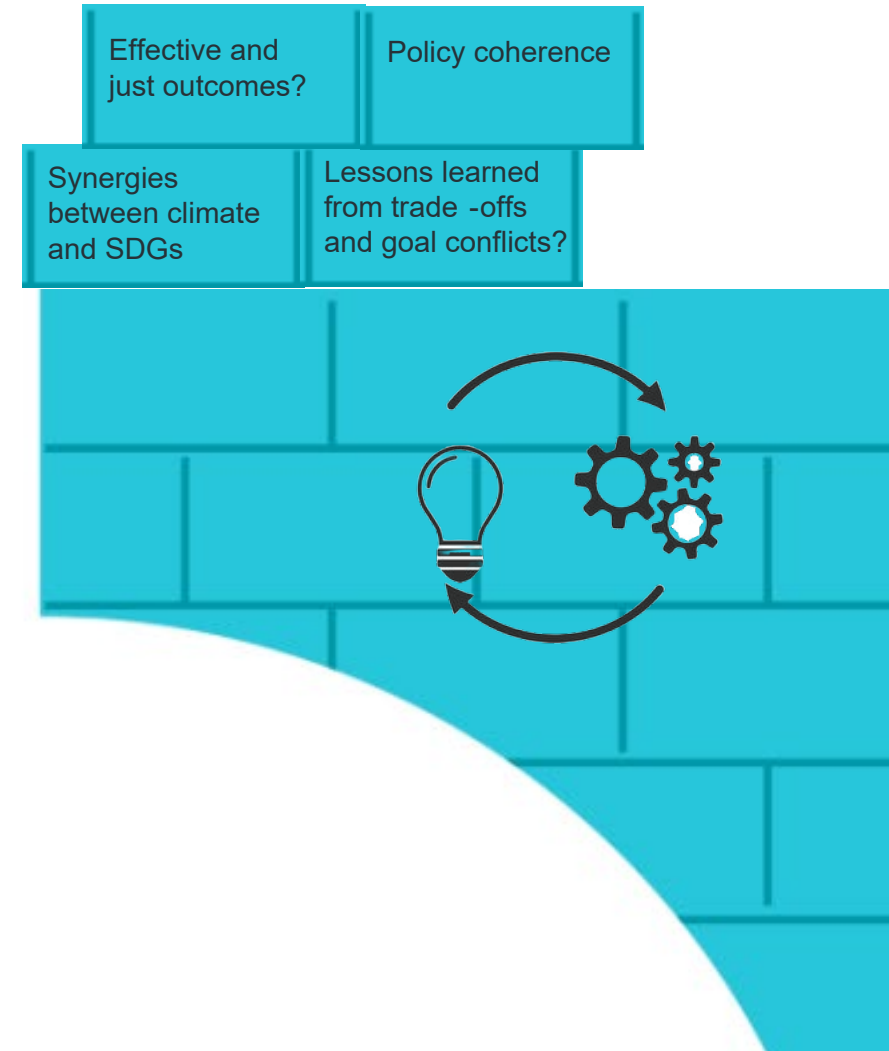

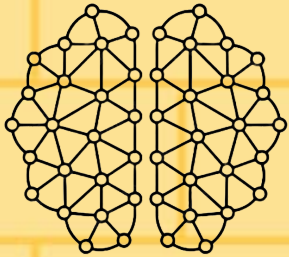

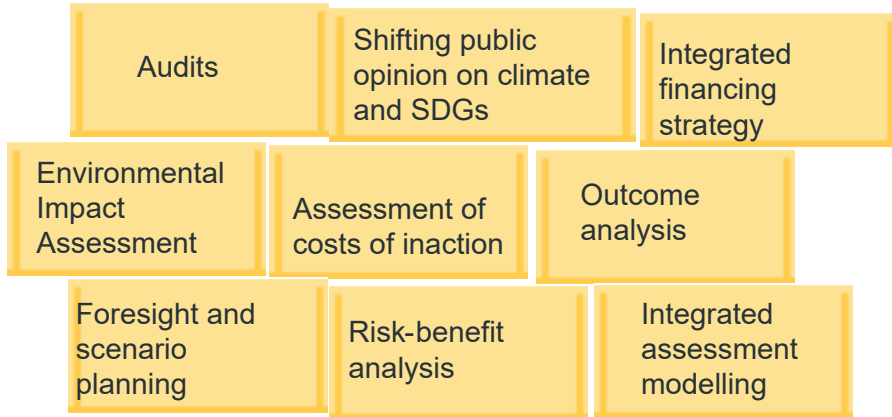

Methodological
Inaccessibility

Insufficient
science-policy
interaction

From your experience, what are the largest knowledge and data gaps that prevent synergistic action?

Gaps in implementation?

**Which global and national mechanisms
can strengthen the data and
knowledge-base on synergistic action?**

Bridging the gap between scientific evidence and applied synergistic action
