2024 Executive Training Course for Policymakers on 2030 Agenda for Sustainable Development

7-10 May, 2024, Incheon, Republic of Korea

Armenia's Updated Nationally Determined Contributions 2021-2030

- Approved by a Government decision on 22 April 2021 and submitted to the UNFCCC on 30 April
- In its updated 2021 NDC, Armenia declares an objective of **40 percent** reduction of its greenhouse gas emissions by 2030, compared to the 1990 levels
- Transparency of mitigation and adaptation actions will be ensured through the introduction of a national Measurement, Reporting and Verification (MRV) system

Mitigation under the NDC

The following sectors have been selected for mitigation action under the NDC of Armenia:

- Energy (Energy Production and Use)
- Industrial Processes and Product Use (Mineral Industry and F-gases)
- Agriculture (Enteric Fermentation, Direct and Indirect N₂O Emissions from managed soils)
- Waste (Solid Waste management, Wastewater)
- Forestry (afforestation, forest protection) and Other Land Use

For the purpose of adaptation action, the focus will be on the following sectors particularly vulnerable to climate change:

- Natural ecosystems (aquatic and terrestrial, including forest ecosystems, biodiversity and land cover)
- Human health
- Water resource management
- Agriculture, including fishery and forests
- Energy
- Human settlements and infrastructures
- Tourism

TOWARDS CLIMATE DECARBONIZATION

Long-term planning until 2050 is undertaken as part of preparation of LT-LEDS

NDC goal

Achieving 40 per cent reduction of GHG emissions by 2030 from 1990 emission level

Long term goal

Reducing GHG emissions to at most 2.07 tCO₂e/capita by 2050

Thank you for your
attention!
