Ministry of Water Resources,  
Center for Hydrometeorological Service,  
Ministry of Health,  
Ministry of Statistics

## Most important SDG 6 target(s) and indicator(s)

Water supply of settlements in desert regions.  
Water distribution of transboundary water resources.  
Water supply of settlements with tap water.  
Cities located in the lower reaches of rivers.

## Reflections on SDG-PSS and its online course

The online course helped to navigate in the direction of work and assess the status of SDG 6 in the country

## Overall status of SDG 6 achievement at the national level

About 90 billion soums (Uzbekistan currency) were allocated to improve the water supply and sewerage system of the Samarkand region. A comprehensive development program for 2020-2023 has been developed for Karakalpakstan. It is planned to create 27 industrial clusters operating on a system "from raw materials to finished products," the report said. Providing the Republic of Uzbekistan with a loan under the state guarantee (sovereign loan) of up to USD 60 million (EUR 50 million) .

## Relevance of SDG-PSS Components

### - Most relevant:

The most relevant are the components of capacity building, public awareness on water supply and sanitation issues.

### - Not/least relevant:

We find it difficult to answer, since all the components are relevant.
